01 PROFILE

A web developer who has been into programming ever since he first googled „how to create a website“ at the age of 12. After tens of projects, he worked his way to feel competent to call himself a senior backend developer. Currently seeking stability for his life so he can start a family in the upcoming years.

02 EMPLOYMENT HISTORY

2017 — Present

Cofounder at Twido

We started Twido to help young students kickstart their career and let them see the possibilities in their respective field. We do this by organizing visits and excursions to interesting companies, discussions with experts, workshops and more.

2016 — Present

Freelance career

During my freelance career I managed tens of projects, coached five backend developers and coopered with many frontend developers.

2020

Senior Symfony Developer at Carvago

Prague

I was at the creation of the architecture of this startup. Made architectural decisions, created internal packages and libraries from scratch. Helped decide on static analysis tools, the architecture of testing, etc.

- Symfony 5
- PostgreSQL
- Docker
- Gitlab
- JIRA

2019

PHP Backend developer at FactCool

Prague

Short experience working on e-commerce project with 6000 orders per day. Mostly focused on introducing microservices in Go.

07/2016 — 12/2017
